not two but three (1 + 1 = 3)
body/object object/body : a playful relationship

Approach to a physical and visual object-theatre

In 5 days we are going to experimente differents approaches to "object theatre" .

we will focus on the relation between the living and not-living,
on the relation between bodies and objects and the performing aspects of
it through improvisation.

we will observe "things" which are around us, objets that determine our
everyday life and explore their fonctions and non-functions.

we will need to find and bring those "things/objects" into class:

let's see what we find:

forgotten things, lost things, favorite things, useful things, banal things...

we will go on a walk with them, we will try to meet, maybe we will
discover their stories, histories, biografies, fictions and truths.

we will play, improvise, do and observe.

we will look for the coincidence not for the idea.

we will try to surprise our expectations what theatre might be...

thank you for bringing 2-3 (big!) objects and comfortable clothes.
